

CenTex OpEx Consortium

A passionate and relentless pursuit to operational excellence!

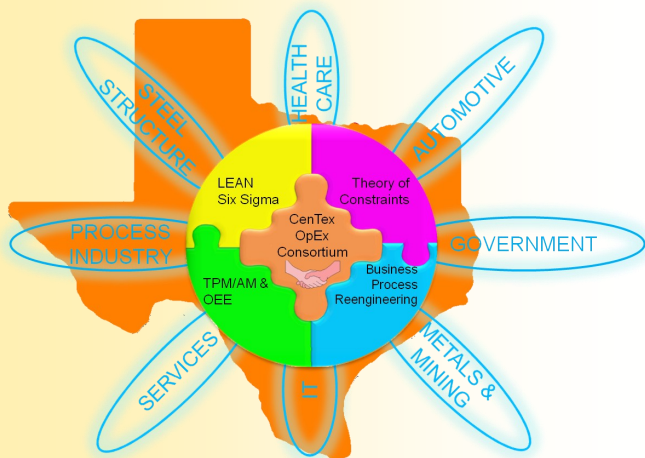

A forum for sharing knowledge and experience between member companies of Central Texas in the use of operational excellence tools and systems. Envisioning an organization where member companies feel compelled to motivate each other and to excel, thereby improving the economy around us

For operations and continuous improvement leaders in the manufacturing, services and government organizations, who:

- Have a need to benchmark operations?
- Have recently reduced OpEx staff?
- Have problems keeping you up at night?
- Have people engagement issues?
- Have the need to reduce cost?
- Have overtime issues?
- Have job stoppages or waiting?
- Have a constraint/bottleneck?
- Have long lead times?
- Have a lot of inventory?
- Have a lot of scrap and rework?

The CenTex OpEx Consortium is a forum for effective benchmarking and a repository of best practices.

CenTex OpEx Consortium adapts to companies' own systems and enables them to learn and share their experiences from their own continuous improvement systems, so that they can move toward the ideal rapidly.

Special Benefits to Members

While the membership fee is minimal, the benefits are significant.

Each member receives an annual system review conducted by highly experienced OpEx Solutions' Associates.

The Consortium hosts learning and training sessions monthly. Each member, based on their membership level, gets 1 to 4 FREE seats for valuable training offered by Global OpEx Solutions and can purchase additional seats at member prices.

Since, no initiative can succeed without good leadership, the Consortium conducts additional activities for leadership development.

In addition, while like interest groups will be formed to maximize learning and sharing, we are committed to protecting the competitive advantage and sensitive information of competing members.
